

RICK SCOTT
GOVERNOR

April 1, 2013

Major General Charles F. Bolden, Jr., USMC, Ret.
Administrator
National Aeronautics and Space Administration (NASA)
NASA Headquarters
Washington, DC 20546-0001

Dear General Bolden:

I wanted to reach out and assure you of Florida's continued interest in Shiloh and the Shuttle Landing Facility. In our continued effort to further demonstrate this state's commitment to securing the needed outcomes in capturing the commercial space launch market at Shiloh and the Shuttle Landing Facility, please consider Space Florida as the formal authority for further correspondence rather than the Lieutenant Governor's office. The working dialogue and negotiations with NASA/KSC for administrative and technical matters will continue through Space Florida staff.

Given the urgency to deliver positive tangible accomplishments to the marketplace on a commercially viable schedule, I know this partnership will be critical to obtaining a productive and effective result. I look forward to working with you and continuing to strengthen Florida's space industry while meeting the needs of NASA.

Sincerely,

A handwritten signature in blue ink, appearing to read "Rick Scott".

Rick Scott
Governor
